

Quick Guide 快速指南

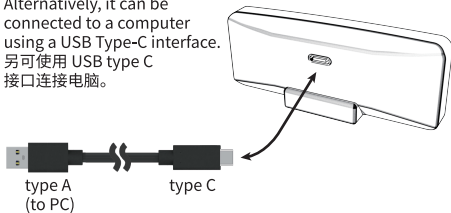

CSD *NANO*

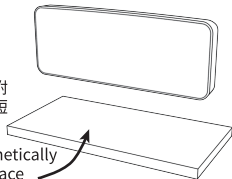

The magnetic attachment method is suitable for the CONSPLIT base equipped with magnetic modules. Remove the magnetic cover on the top of the base. Align the interface at the bottom of the instrument with the magnetic interface on the base and place it so that it adheres to the base. This method requires no additional wiring.

磁吸连接方式适用于搭载磁吸模块的CONSPLIT基座。取下基座顶部磁吸盖。将仪表底部接口对准基座磁吸接口放置，使其吸附在基座上。此方法无需额外接线。

Alternatively, it can be connected to a computer using a USB Type-C interface. 另可使用 USB type C 接口连接电脑。

When used independently away from the base, be sure to attach it to a flat iron surface to prevent probe short-circuiting. 脱离基座独立使用时，务必吸附在平整的铁质表面，以免探针短路。

CONSPIT

The logo features the word "CONSPIT" in a bold, italicized, sans-serif typeface. The letters are closely spaced, and the overall style is dynamic and modern. Below the text, there is a thick, solid horizontal line that tapers slightly at both ends. Directly beneath this thick line is a second, thinner horizontal line, also tapering at the ends, creating a double-line underline effect.
